

# Harowe Resolvers for Nuclear Monitoring

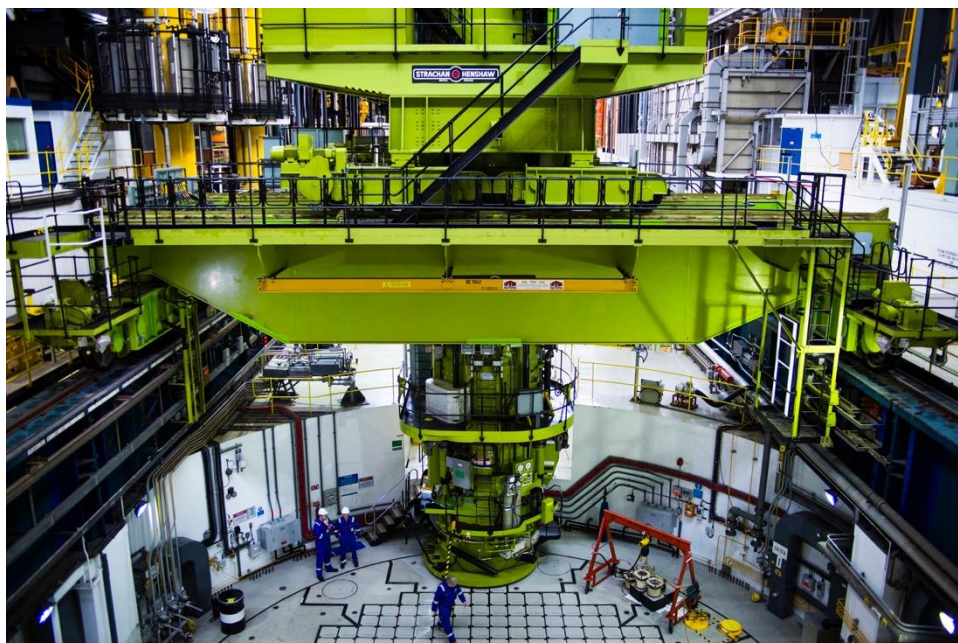

As a leading supplier in the feedback controls industry, our Harowe resolver products are integral parts of some of today's leading Nuclear related industries. We can help you design the perfect solution for your specific application requirements.

Our Frameless Brushless Resolver and Housed Brushless Resolver products are an ideal mate for brushless servomotors, commutating brushless servo motors and other applications requiring feedback in the most challenging environments, offering durable and rugged performance with radiation hardened options, and unmatched performance in environments where high mechanical shock, vibration and contamination are of concern.

Market leaders around the world are using Harowe resolvers for their applications.
